I actively use digital tools in my daily life, particularly for learning new skills such as developing websites and applications. These tools also help me relax and conduct research, whether exploring new technologies or seeking relevant information.

Through this course, I aim to learn how to effectively connect databases to websites using PL/SQL. I also hope to acquire a deeper understanding of various commands and programming techniques that will enhance my development skills.

What I know about you, my instructor, is that you specialize in PL/SQL, and I look forward to learning more from your expertise.
